

Project Name: Bullet-Resistant Components for PD Vehicles

Recipient: City of Burleson, TX

Address: 141 West Renfro Street, Burleson, Texas 76108

Amount Requested: \$334,927

Project Explanation:

Standard vehicle doors and glass provide little to no resistance against firearms, increasing the risk of serious injury or death to officers responding to violent crimes or engaging in pursuits. By upgrading the glass and door panels of select patrol vehicles to bullet-resistant materials, this project seeks to address a critical officer safety gap. These enhancements will mitigate the risks associated with routine traffic stops, felony arrests, and tactical operations. Strengthening vehicle protection directly supports the mission to safeguard both officers and the communities they serve.

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for City of Burleson Bullet-Resistant Components for PD Vehicles in Fiscal Year 2027. The entity to receive funding for this project is The City of Burleson, located at 141 West Renfro Street Burleson, Texas 76018. The funding would be used to equip the City of Burleson's Police Vehicles with bullet-resistant door panels and ballistic glass. The project is an appropriate use of taxpayer funds as it would significantly reduce exposure risk for officers responding to high-threat situations and improve the overall safety and resiliency of its law enforcement operations. The project has a federal nexus because the funding provided is for purposes authorized by section 1701 (b)(9) of the Omnibus Crimes Control and Safe Streets Act of 1968 (34 U.S.C. § 10381(b)(9)). I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

In God we trust,

Project Name: Aerial Security & Counter-UAS Network

Recipient: City of Arlington, TX

Address: 101 West Abram Street, Arlington, Texas 76010

Amount Requested: \$1,000,000

Project Explanation:

This layered detection framework establishes early warning capability and strengthens first responder ability to access intent and coordinate a timely response to unauthorized and malicious drone activity.

As the City of Arlington continues to host large-scale, high-attendance events across multiple venues and entertainment corridors, portable UAS platforms will enhance the ability to provide immediate aerial situational awareness, reduce response times, support perimeter security, and assist with suspect tracking, crowd monitoring, and incident management.

March 6, 2025

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for the City of Arlington's Aerial Security & Counter UAS Network in Fiscal Year 2027. The entity to receive funding for this project is the City of Arlington, located at 101 West Abram Street Arlington, Texas 76010. The funding would be used to acquire an integrated aerial security network encompassing expanded response airframes, layered detection systems, lawful mitigation capability, establishing early warning capability and strengthening Arlington's first responder's ability to assess intent and coordinate a timely response to unauthorized and malicious drone activity. The project is an appropriate use of taxpayer funds because it will enhance the city's ability to provide immediate aerial situational awareness, reduce response times, support perimeter security, and assist with suspect tracking, crowd monitoring, and incident management, ensuring comprehensive coverage during high attendance events. The project has a federal nexus because the funding provided is for purposes authorized by section 501 of the Omnibus Crime Control and Safe Streets Act of 1968 (34 U.S.C. § 10152) I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

In God we trust,

Roger Williams
Member of Congress

Project Name: Public Cybersecurity Center

Recipient: Tarleton State University

Address: 1333 West Washington Street, Stephenville, Texas 76401

Amount Requested: \$5,800,000

Project Explanation:

The PCC's economic impact is expected to be substantial in TX-25, spanning research innovation and business growth while bolstering the local economy. The center's work will extend across the north and central Texas regions. Collaborations with industry may drive local economic growth by commercializing new technologies, potentially leading to new startup formations. The center's initial research agenda builds on existing TSU projects and leverages AI to enhance impact. Notably, TSU's previous study for the National Institute of Justice (NIJ), which analyzed Dark Web drug markets, provides valuable insights into threat actor behavior, anonymized transaction techniques, and hidden online networks. These insights are pivotal for creating AI-driven tools for threat detection and vulnerability analysis. By applying knowledge from Dark Web research, this project can integrate machine learning models to identify suspicious patterns in network traffic, detect indicators of underground market activity, and improve prediction capabilities for cyber threats originating in hidden networks. Additionally, the current Cybersecurity Learning Community already set a win-win collaboration network that will support the operation of the Center.

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for the Public Cybersecurity Center (PPC) in Fiscal Year 2027. The entity to receive funding for this project is Tarleton State University, located at 1333 W. Washington Street Stephenville, Texas 76401. The funding would be used for establishing the Public Cybersecurity Center (PCC) located at Tarleton State University (TSU). The PCC, designed as a research-intensive center, will operate as a comprehensive hub for small businesses, local and regional governments, and communities in North and Central Texas, to address their unique cybersecurity needs. The project is an appropriate use of taxpayer funds because this system aligns with the NIST Cybersecurity Framework (CSF) core functions of: Detect, Identify, Respond, Protect, and Recover. Key outcomes include increased detection precision, proactive vulnerability management, and efficient resource allocation, which together, will strengthen the cybersecurity of our nation's critical infrastructure. The project has a federal nexus because the funding provided is for purposes authorized by section 272 of title 15 United States Code (15 U.S.C. § 272). I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

In God we trust,

A handwritten signature in black ink that reads "Roger Williams".

Roger Williams
Member of Congress

Project Name: Knox One Tank Rehabilitation

Recipient: City of Granbury, TX

Address: 116 West Bridge Street, Granbury, Texas 76048

Amount Requested: \$884,000

Project Explanation:

The Knox One Ground Storage Tank plays a critical role in maintaining drinking water reliability and system pressure for the City of Granbury. Rehabilitation of the tank will preserve one million gallons of water storage capacity necessary for residential service and hospital operations. The project addresses aging infrastructure and ensures the continued safe delivery of drinking water to the community. Rehabilitating the tank will cost significantly less than constructing a new tank while providing decades of additional service life.

Roger Williams
Member of Congress

Project Name: Western Waterline Loop Project

Recipient: City of Granbury, TX

Address: 116 West Bridge Street, Granbury, Texas 76048

Amount Requested: \$1,488,000

Project Explanation:

This project addresses an immediate need to improve water system reliability and redundancy in the western portion of Granbury. Currently, this area is served by limited transmission capacity, which constrains operational flexibility and increases risk during system disruptions. The proposed transmission line will provide a secondary feed, allowing the city to isolate sections of the system without interrupting service and ensuring adequate pressure for residential use. Additionally, this infrastructure investment supports ongoing development near Granbury Regional Airport and along the Loop 567 corridor, ensuring that growth can occur without compromising system performance or public safety.

March 20, 2025

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for the City of Granbury Western Waterline Loop Project in Fiscal Year 2027. The entity to receive funding for this project is the City of Granbury, located at 116 W. Bridge Street, Granbury, Texas 76048. The funding would be used to construct the Western Waterline Loop, a critical improvement to the city's municipal drinking water distribution system. The project is an appropriate use of taxpayer funds as it installs new water transmission lines, creating a looped water system serving the western portion of Granbury, including areas surrounding Granbury Regional Airport and Highway Loop 567. Creating this loop will improve system reliability, allow sections of the water system to be isolated during repairs, and ensure continuous water service to residents, businesses, and emergency services. The project has a federal nexus because the funding provided is for purposes authorized by Section 1452 of the Safe Drinking Water Act, 42 U.S.C. 300j-12. I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

In God we trust,

March 20, 2025

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for the City of Millsap Wastewater System Improvements in Fiscal Year 2027. The entity to receive funding for this project is the City of Millsap, located at 208 Fannin Street, Millsap, Texas 76066. The funding would be used to construct a wastewater treatment plant and collection system that would serve approximately 275 connections in the City of Millsap, TX. The project is an appropriate use of taxpayer funds as the city sits on a bed of shale, making conventional sewer systems very difficult to maintain, so a collection and treatment system is needed to sustain the City's residential and commercial needs as well as those of Millsap Independent School District. The project has a federal nexus because the funding provided is for purposes authorized by Title VI of the Clean Water Act, 33 U.S.C 1381 et seq. I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

In God we trust,

A handwritten signature in black ink that reads "Roger Williams".

Roger Williams
Member of Congress

Project Name: Rural Healthcare Quality and Safety Project

Recipient: Texas Health Resources

Address: 612 East Lamar Boulevard, Arlington, Texas 76011

Amount Requested: \$2,500,000

Project Explanation:

This project will modernize the medical-surgical unit at Texas Health Harris Methodist Hospital Stephenville (THS) to better align with the safety and quality standards implemented across the Texas Health Resources enterprise. Upgrading aging inpatient infrastructure will improve infection prevention, reduce fall risk, and enhance patient privacy and comfort. A key component includes adding private showers to inpatient bathrooms, which will replace shared facilities that can increase the risk of healthcare-acquired infections and create safety challenges for patients with limited mobility.

These improvements will also support staff efficiency and create a safer environment for both patients and healthcare workers. THS provides clinical rotations for nursing residents from Tarleton State University, Ranger College, Weatherford Community College, the University of North Texas, and Baylor University. Modernized facilities are essential to providing high-quality experiential training opportunities for these students as we build the next generation of the healthcare workforce.

March 27, 2026

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for City of Stephenville Rural Healthcare Quality and Safety Project in Fiscal Year 2027. The entity to receive funding for this project is Texas Health Resources, located at 612 E. Lamar Blvd, Arlington, Texas 76011. The funding would be used to modernize the medical-surgical unit at Texas Health Harris Methodist Hospital Stephenville, so that it more closely reflects the standards of care, safety, and patient experience offered at other THR hospitals. The project is an appropriate use of taxpayer funds as it would upgrade aging inpatient infrastructure, improve infection prevention, reduce fall risk, and enhance patient privacy and comfort. Because it is the only hospital in Erath County, maintaining public confidence in the hospital's ability to deliver safe, high-quality care is especially important. The project has a federal nexus because the funding provided is for purposes authorized under the Public Health Service Act. I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

In God we trust,

A handwritten signature in black ink that reads "Roger Williams".

Roger Williams
Member of Congress

Project Name: Tarleton Agriculture Center Meat Science Laboratory Infrastructure Modernization

Recipient: Tarleton State University

Address: 1333 West Washington Street, Stephenville, Texas 76401

Amount Requested: \$3,200,000

Project Explanation:

The project will produce direct regional economic development benefits by strengthening the workforce pipeline, improving business competitiveness, and increasing the resilience of the regional food system. A modern Meat Science Laboratory will expand hands on learning, and workforce preparation, for students pursuing careers in animal production, meat processing, food safety inspection, quality management, supply chain logistics, and food business operations. This supports higher skill, higher wages, career pathways, and helps regional employers recruit and retain qualified workers. The facility will also expand Tarleton's capacity to deliver practical outreach, and training, for producers, processors, and small businesses, including education related to animal handling, carcass evaluation, yield and quality improvement, food safety best practices, and regulatory awareness.

The funding would be used to rehabilitate a city-owned facility that serves primarily low and moderate-income residents by co-locating essential services. The project is an appropriate use of taxpayer funds because the rehabilitation of this facility will maintain critical services and promote community stability, public safety, and economic self-sufficiency. The project has a federal nexus because the funding provided is for purposes authorized by 42 U.S.C. 5302(a)(4). I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

In God we trust,

Project Name: Paluxy River Pedestrian Connectivity Bridge Project

Recipient: City of Glen Rose, TX

Address: 201 NE Vernon Street, Glen Rose, Texas 76043

Amount Requested: \$3,600,000

Project Explanation:

The project will construct a pedestrian and bicycle bridge across the Paluxy River adjacent to the State Highway 144 crossing. The project will provide a safe, dedicated pedestrian connection between the city's riverfront recreation areas, including Big Rocks Park, and the historic downtown commercial district.

Currently, residents and visitors must rely on a vehicular highway crossing not designed for pedestrian traffic or take indirect routes, limiting safe access between these key destinations. As a result, foot traffic from the riverfront does not efficiently reach downtown businesses. The proposed project will be constructed as a single-span prefabricated pedestrian bridge to minimize cost, reduce construction time, and limit environmental disruption. The project will improve pedestrian safety, strengthen connectivity, and convert existing visitor activity along the Paluxy River into direct access to downtown small businesses.

March 27, 2025

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for the Paluxy River Pedestrian Connectivity Bridge Project in Fiscal Year 2027. The entity to receive funding for this project is the City of Glen Rose, located at 201 NE Vernon Street, Glen Rose, Texas 76043. The funding would be used to construct a pedestrian and bicycle bridge across the Paluxy River adjacent to the State Highway 144 crossing. The project will provide a safe, dedicated pedestrian connection between the city's riverfront recreation areas and the historic downtown commercial district. The project is an appropriate use of taxpayer funds because it invests in a durable public asset that delivers immediate and long-term economic and community benefits to public safety and economic self-sufficiency. The project has a federal nexus because the funding provided is for purposes authorized by 23 U.S.C. 133. I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

In God we trust,

A handwritten signature in black ink that reads "Roger Williams".
